Fusion Payroll at a glance

Fusion Payroll runs Canadian payroll in Odoo 19, built and supported by Nexa Systems.

It calculates income tax, CPP, CPP2 and EI for every province and territory except Quebec, and produces the cheques, deposit files, remittances, Records of Employment and year-end slips.

Who it is for

Canadian employers outside Quebec who pay staff weekly, biweekly, semi-monthly or monthly, with a Payroll Officer who prepares each run and a Payroll Manager who marks the bank file uploaded.

Next step

Book a one-hour call at nexasystems.ca/appointment/1, or call 905-792-0000.

What your office gets

- ✓ Hours, overtime and vacation pay are entered for each employee on one grid for the pay period.
- ✓ The CPA-005 direct-deposit file is built for the run, and its paycheques lock once the upload to the bank is recorded.
- ✓ T4 slips, T4 Summaries and T4A slips print on CRA's own PDF forms, and Records of Employment export as a BLK file for ROE Web.
- ✓ A row with no SIN, no province or incomplete bank details is flagged before paycheques are made, and Quebec payroll is blocked rather than calculated wrong.
- ✓ Each paycheque's CPP, EI and income tax belongs to exactly one CRA remittance, with a PD7A worksheet and voucher to print.
- ✓ When we publish an update for new CRA rates, your payroll managers are told it is waiting and see exactly what changes before they apply it.

What is included

1 Set up the employees

2 steps, page 8

2 Run payroll

6 steps, page 11

3 Remit and report

4 steps, page 18

4 Year end and reports

6 steps, page 23

How it is delivered

Custom-coded around your process after a first meeting.

Hosted on our own servers in Ontario.

Supported by the team that built it: business hours for everyone, plus an emergency line for hosted clients.

Where payroll goes wrong in an Ontario business

Each row is a step in the walkthrough, shown on its own screen.

Without a system

With Fusion Payroll

An employee is missing a SIN or bank details, and it is found after the paycheques are made.

The grid marks the row as needing attention and says why, before any paycheque is made.

2 Step 2.2
Page 13

Someone edits an employee's pay after a paycheque was made, and the paycheque quietly changes.

Each paycheque keeps the pay facts it was made with. A raise or a TD1 change applies to the next paycheque.

2 Step 2.4
Page 15

Nobody is sure whether this run's deposit file has already reached the bank.

A Payroll Manager marks the file uploaded. Until then the batch shows a warning, and after it the paycheques in the file are locked.

2 Step 2.6
Page 17

The month's CPP, EI and tax are added up by hand for the PD7A, and a paycheque can be counted twice or missed.

Each paycheque's CPP, EI and income tax belongs to exactly one CRA remittance, with a PD7A worksheet and voucher to print.

3 Step 3.1
Page 19

An employee leaves, and the Record of Employment has to be built from every pay period of the year.

The ROE lists insurable earnings for each pay period and generates the BLK file for ROE Web. Paper copies are marked not for submission.

3 Step 3.4
Page 22

At year end, the T4 Summary has to agree with what was actually remitted to CRA during the year.

The T4 Summary's remittances line is filled from the year's paid CRA remittances, and any unpaid period is listed.

4 Step 4.1
Page 24

The whole route on one page

Four phases, from the employee record to the year-end slips. Each step is shown on its own screen in the walkthrough.

1 Set up the employees				2 Run payroll				3 Remit and report				4 Year end and reports			
Each employee gets a payroll record with a validated SIN, a home address, a province of employment and a pay schedule.				The pay period is walked through hours, preview and approval to cheques and the direct-deposit file.				Source deductions become CRA remittances with a PD7A to print, and a leaver gets a Record of Employment.				T4 slips, T4 Summaries and T4A slips, and payroll reports that export to spreadsheets and PDF.			
1.1	Add your employees	9		2.1	Start from the pay cycle	12		3.1	Track CRA remittances	19		4.1	File T4, T4A and the T4 Summary	24	
	Payroll Officer				Payroll Officer, Payroll Manager				Payroll Officer				Payroll Officer		
1.2	Complete the payroll record	10		2.2	Load the hours	13		3.2	Match the payment to CRA	20		4.2	Open the payroll reports	25	
	Payroll Officer				Payroll Officer				Payroll Officer				Payroll Manager		
				2.3	Preview the run	14		3.3	See every CRA payment	21		4.3	Payroll Summary	26	
					Payroll Officer				Payroll Manager				Payroll Manager		
				2.4	Check a paycheque	15		3.4	Issue the Record of Employment	22		4.4	Paycheque History	27	
					Payroll Officer				Payroll Officer				Payroll Manager		
				2.5	Submit the run	16						4.5	Payroll Tax Liability	28	
					Payroll Officer								Payroll Manager		
				2.6	Build the direct deposit file	17						4.6	Total Payroll Cost	29	
					Payroll Officer, Payroll Manager								Payroll Manager		

Screens show invented data from a demo company.

What the system checks for you

Each check runs inside Fusion Payroll at the step shown.

✓ Rows that need attention

No province, no SIN, a Quebec employee or incomplete bank details puts a Needs attention badge on the row and says why.

Checked at step 2.2, page 13

✓ Hard stops on the run

Quebec payroll is blocked, hours with no rate are refused by name, and a paid period cannot be run twice.

Checked at step 2.5, page 16

✓ Deposit date and upload

A Saturday or Sunday deposit date is refused, a statutory holiday is warned by name, and an uploaded file locks its paycheques.

Checked at step 2.6, page 17

✓ Remitted exactly once

Each paycheque's CPP, EI and income tax belongs to exactly one CRA remittance.

Checked at step 3.1, page 19

✓ Short or excess payments

Short or excess payments against the remittance amount are flagged, and a paid remittance cannot be changed.

Checked at step 3.2, page 20

✓ Paper is not the filing

Paper ROEs print with a NOT FOR SUBMISSION watermark, so they are never mistaken for the filed record.

Checked at step 3.4, page 22

A paycheque that was wrong inside a paid period is corrected in the next period, so a period already remitted stays as it was paid.

Built for Canadian payroll

Runs inside Odoo 19

It works with Odoo Payroll, Time Off, Attendances and Invoicing, and posts payroll journal entries to your books.

CRA's formulas and forms

Income tax follows CRA's T4127 formulas, and T4 slips, T4 Summaries and T4A slips print on CRA's own PDF forms.

Always current with CRA

CRA publishes new payroll deduction formulas twice a year, effective January 1 and July 1. When it does, we publish an update for Fusion Payroll, and a payroll manager applies it.

Quebec, stated plainly

Every province and territory except Quebec. Payroll for a Quebec employee is blocked rather than calculated wrong.

Moving from another payroll

Historical paycheques, filed T4 XML, ROE BLK records and remittance history can be imported, including from QuickBooks exports.

A Toronto team

Nexa Systems is based in Toronto, Ontario, and builds custom ERP systems and business apps on Odoo.

How a project works with Nexa

1

A first meeting

We meet your team to see how you pay staff today: schedules, provinces, hours and who signs off each run.

2

Built around your process

Every project is custom-coded after that meeting, around the way your office runs payroll.

3

Hosted in Ontario

Your system runs on our own servers in Ontario.

4

Supported by the team that built it

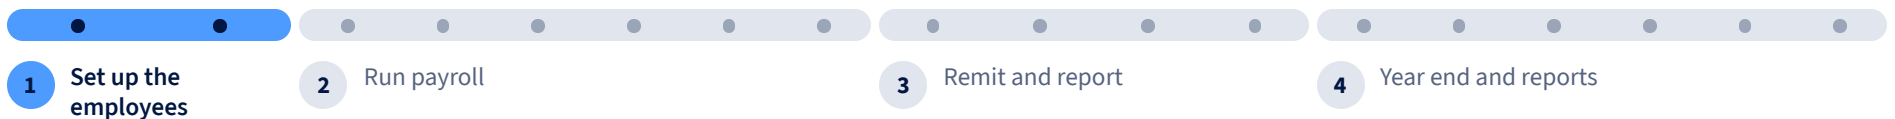

Business hours support for everyone, plus an emergency line for hosted clients.

Fusion Payroll is built on Odoo. Every project is custom-coded, so this guide lists no prices.

Set up the employees

Each employee gets a payroll record with a validated SIN, a home address, a province of employment and a pay schedule.

1.1	Add your employees Leavers stay on file, and the pay run loads only active employees.	Payroll Officer	9
1.2	Complete the payroll record The province of employment on the record is what each paycheck is taxed by.	Payroll Officer	10

Taxes and net pay marked "(estimate)" are estimates: each row uses its own province and pay frequency, the basic personal amount of 121 claim and every other credit, and prices a bonus or retro pay with the CRA bonus method, but the estimate prices the period as the first paycheque of the year, so it ignores year-to-date CPP, CPP2 and EI caps already reached and bonuses paid earlier this year. Preview paycheque shows the engine's exact figures.

3 Step 3.1 of 18

Track CRA remittances

Payroll Officer

What happens

Each month of source deductions becomes a CRA remittance with its due date and payment status.

What it saves you

Your remitter type is checked against CRA's average monthly withholding thresholds.

Payroll Tax Remittance created

3 Step 3.2 of 18

Match the payment to CRA

Payroll Officer

What happens

A remittance is marked paid when the matching payment posts on the CRA payroll account, and the PD7A worksheet and voucher print from it.

What it saves you

Short or excess payments against the remittance amount are flagged, and a paid remittance is locked.

Questions a manager will ask

Does it work for employees in Quebec?

No. Every province and territory except Quebec is covered, and payroll for a Quebec employee is blocked rather than calculated wrong.

Does it pay our employees and CRA for us?

No. It prints the cheques and builds the CPA-005 file your staff upload to the bank. A CRA remittance is marked paid using the bank payment already recorded.

What if a paycheque was wrong?

A paycheque that was wrong in a period already remitted is corrected in the next period. Paycheques keep the pay facts they were made with, so a later change to the employee does not reprice them.

Where is our data kept?

On our own servers in Ontario.

How do the tax rates stay current?

CRA publishes new formulas effective January 1 and July 1, and we publish an update each time. Your system checks every week, tells your payroll managers, and shows what changes before they apply it.

Can we bring our payroll history across?

Yes. Historical paycheques, filed T4 XML, ROE BLK records and remittance history can be imported, including from QuickBooks exports.

Can we see what payroll costs us?

Yes. Total Payroll Cost adds wages, company contributions and employer taxes, and thirteen reports export to spreadsheets and PDF.

Who do we call when something goes wrong?

The team that built your system: business hours for everyone, plus an emergency line for hosted clients.

Next steps

- 1

Book a call

Scan the code or go to nexasystems.ca/appointment/1 to book a one-hour consultation.
- 2

Bring your payroll

Tell us how you pay staff today: schedules, provinces, how hours are kept and who signs off each run.
- 3

See it on a demo system

We walk through the steps in this guide on the demo company, with your payroll in mind.

Or call 905-792-0000 during business hours.
